

# Internet Information Services Requirements

V1.0  
July 2010

## *Ormed IIS Requirements*

### 1. IIS version 6 or above

- a. When installing IIS7, ensure that the entire **Application Development** section is selected as well as the **Windows Authentication** item in the **Security** section.

### 2. Web Deploy IIS Extension version 1.1 or above

**Note:** This extension can be provided by Ormed, or downloaded from <http://www.iis.net/download/WebDeploy>

### 3. .NET Framework version 4.0 or above

**Note:** This package can be provided by Ormed, or downloaded from <http://www.microsoft.com/downloads/details.aspx?familyid=9CFB2D51-5FF4-4491-B0E5-B386F32C0992&displaylang=en>

### 4. The web site must be configured to be ASP 4.0

- a. IIS6: this is set at the web site level
- b. IIS7:
  - I. At the application pool level, ensure that the ASP .NET v4.0 pool is configured to user the .NET Framework v.4.0
  - II. Then at the web site level, under Advanced Settings, set the application pool to be the ASP 4.0

### 5. If exposing the site outside of the secure network, SSL/TLS is required. An SSL certificate must be purchased and installed on the IIS server.

- a. The appropriate ports also have to be configured in IIS and opened up through the firewall.
